

Business Mentoring and Money Mindset

MASTERMIND COACHING for Your Success

Six Key Elements to Create Cash Flow in your Life and Business

The Mastermind Coaching Change Makers have *Six Things* You Must Know for money to flow to you, as well as through you, and your business.

1. **As an entrepreneur, you're chief aim is to Earn Revenue.** As CEO of your business, it's important that you know the terms of business so you're well-grounded in what will help money flow to you and through you. Knowing the terminology of biz and aligning with the possibilities you've outlined for your business, allows revenue to flow to you easily so you can spend some, save some, and pay yourself.
2. **The flow of revenue is only as good as your Plan.** It doesn't really matter if your plan is a one-page plan or 20, or 60 pages. Having a business plan is more about whether or not you've thought about the possibilities of and for your business, and it's really important. Know the possibilities (revenue, #clients/customers/programs) and open the flow of money.
3. **Taking inspired action can be learned.** If taking inspired action feels like pushing yourself to do this and do that, the energy of pushing and things needing to be done can made life hard and exhausting. Real inspired action comes from a place of heart and love, for yourself, your biz and for the work that you do.
4. **Define your purpose for having money.** First, you must understand that money is a convenient exchange of energy that happens to mainly be cash (or credit) in exchange for products and/or services. It even includes bartering. Then you can define your purpose for having money. EX: Would it improve your life, and how? Would you be able to do more for yourself, family, friends, and in your business?
5. **Attitude governs.** Money is NOT a paper and metal kind of thing. It's an idea kind of thing. There's the mentalness of money and how you attract or repulse it via your thoughts, your emotions, and especially your feelings and your vibrational level. No Negative Thinking! Think the positive things of money, regardless of what it might seem like, and your vibration will remain high allowing money to flow automatically into your experience.
6. **Know what you need and set your intention.** If what you think is what you get – and that is true – then you have to establish a clear vision of how much money you need and want.
 - a. You have to know what your bottom line is – your “monthly nut” some have called it – and then you have to
 - b. Govern the feelings behind your overall language, and
 - c. Sustain your right thinking and feeling good.

When it seems like money is at the forefront of your thoughts, review these 6 keys and keep the flow of money open to you and your business.

The ***Business Mentoring and Money Mindset Mastermind Coaching*** program will support you in having a clear money intention, maintaining your energy, sustaining your focus, and personally creating a powerful outcome!
